

CT

WHAT TO EXPECT WITH YOUR UPCOMING PROCEDURE

What is a CT?	● An CT is a medical imaging test that combines specialized X-ray equipment with computers to produce multiple cross-sectional images (or "slices") of the body. It provides much more detail than a standard X-ray and is used to view bones, organs, and soft tissues
Before Your Procedure	● Some CTs need to be done within a certain timeframe for surgical planning. Our team will schedule according to your surgeons guidelines ● If your insurance requires authorization, our team will obtain it. We also offer options for discounted cash pay scans.
Day of Procedure	● You may be asked to change into a gown/shorts ● There are no eating/drinking restrictions ● If you are being medicated for your scan, you must arrive 45 minutes early for your appointment with a driver
Following the Procedure	● Images are available immediately for your provider to review ● Reports are typically available within 48 hours
